

# The Proper Way to Place Your Trash and Recycling Containers

Place your container, so the wheels and handle are facing your house, and make sure the lid is closed.

Below are 3 examples of proper placement.

### Street Placement

Wheels against the curb and facing your house

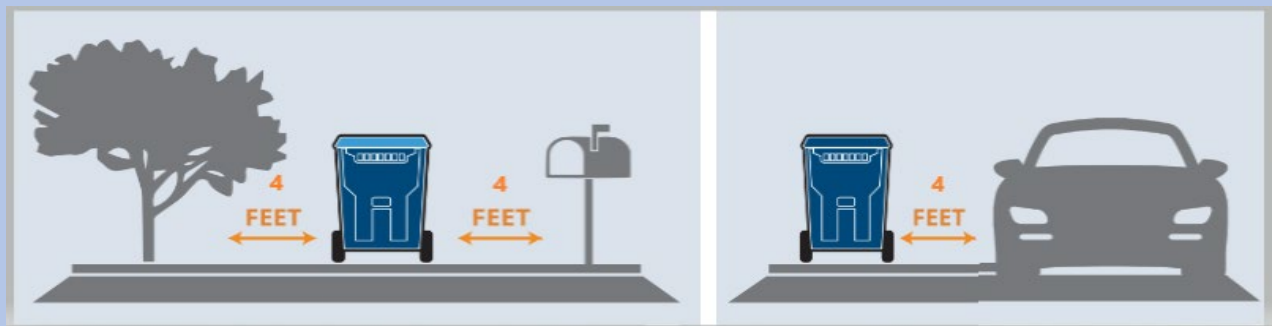

### Sidewalk Placement

Wheels facing your house  
If possible, please be mindful of keeping the sidewalk passable

### Driveway Placement

Wheels facing your house at the edge of your driveway

To avoid damage and ease-of collection, maintain a **4-foot gap** between your container, trees, mailbox, cars or other objects.

The hauler **will not** collect bags that are placed next to or on top of the container, or any container with a lid that won't close.
